Election/Restrictions

- I. Claims 92-120, drawn to a filter for filtering gases, classified in class 96, subclass 4
- II. Claims 121-153, drawn to a process of making a filter, classified in class 264, subclass 42.
- III. Claims 154-156, drawn to a process of filtering with a composite filter, classified in class 95, subclass 45.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the filter of group I is not limited to the process of making including preheating the support, posttreatment with reducing agent, bonding of the filter material to a container, or welding is also not a limitation of the filter product, and therefore the process of making constitute a distinct invention.
3. Inventions I, and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can

be used in another gas separation processes, e.g. separation of mixtures of gases by selectively permeating one type of gas through the filter.

4. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Groups I and III, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Milton F. Sterman on 9/17/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ana M Fortuna whose telephone number is (703) 308-3857. The examiner can normally be reached on 9:30-6:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda L. Walker can be reached on (703) 308-0457. The fax phone
